

Standard continuous supported sole plate for boltable clamps

Characteristics of continuous supported sole plate:

- Length: Standard 5980 ± 5 [mm].
- Width: Varying between 150 and 500 [mm].
- Thickness: Varying between 12 and 50 [mm].
- Material: S235JR, S275JR, S355J2.
- Preservation: coating, duplex system, hot dip galvanized, or Self-coloured
- Tolerances: According to NEN EN 10029, Thickness class D, Flatness class N
